

CATH-TECH™ CUTTERS

Cath-Tech™ Cutters can be a valuable tool when it comes to cutting extruded tubing. Cutters are available in a variety of cutting types and sizes and can be calibrated to cut within certain tolerances. In many cases, cutters are typically used before any tubing piece enters the assembly process. With this machine, we've simplified the cutting process to ease assembly and create a more streamlined process for operators.

Key Features

- » Inexpensive solution for cutting extruded tubing.
- » Cath-Tech™ Cutters can be manufactured from 2 types of metals: Stainless Steel or Aluminum.
- » Cuts to exact measurements within designated specifications.
- » Customized options available.
- » Various materials can be cut.
- » Full product support.

Choose from 4 different cutting types.

CT VBR Cutter - (V Block Roller)

CT CRB Cutter - (Cross Roller Bearing)

CT Guillotine Cutter

CATH-TECH™

CUTTERS

CATH-TECH™ V Block Roller

CT VBR Cutter - The V Block Roller Cutter uses circumferential cutting to cut uniformly all around specific tubing dimensions. The device uses a ball bearing system for simple and straight cuts. In general, extruded tube between 8-10 Fr in size are best used on this device. One size does not fit all. (See reverse for more images)

CATH-TECH™ Cross Roller Cutter

CT CRB Cutter - The Cross Roller Cutter uses ball bearings for straight, exact cuts. This cutting system can be used with braided or non-braided tubing specifications and can be built with an internal pin to cut against. Includes quick release functionality for changing out razor blade when needed.

CATH-TECH™ Guillotine Cutter

CT Guillotine Cutter- The Guillotine Cutter is used in more rapid manufacturing environments. It is simple and easy to use. This device cuts tubing to specific lengths setting aside any precision lengths with a straight vertical movement.

About Us

The R & D Engineering team has been designing, programming and manufacturing custom machines for tooling, automation and process development for the medical device market for the last 40 years. Our experience, knowledge and capabilities enable us to work across various processes and applications with the end goal to improve our customer's productivity and quality.

CATH-TECH™ is a Family of Catheter Manufacturing Equipment
