

R & D Engineering is your premier provider of medical device manufacturing equipment. We are equipped to design, develop and manufacture precision machined parts, tooling, fixtures, and assembly equipment. This is accomplished via design and engineering services, machining technology, automation integration, and a family of customizable assembly machines used in the construction of medical devices.

## CAPABILITIES

---

### Design Engineering

- Process Development
- Equipment Manufacturing
- CAD (Computer-Aided Design)
- Tooling

### Automation

- Integration
- Controls
- Vision
- Compliance/Data Logging
- Programming
- Robotics

### Fabrication & Machining

- Milling
- Lathe
- Grinding
- Turning

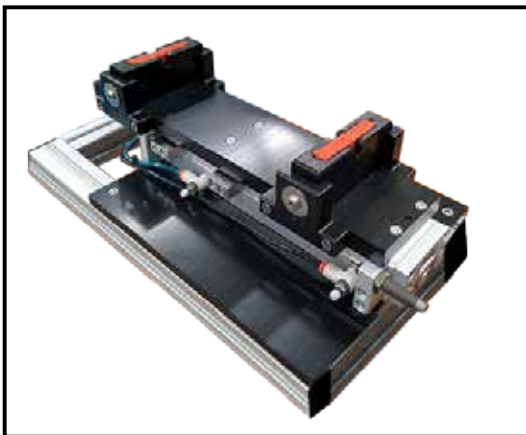

### Validation

- Test
- OP/PQ
- Quality Assurance

## SERVICES

---

Installation  
Process Validation  
Product Training  
Field Service Calibration  
Warranty  
Spare Parts  
Refurbish/Used Equipment

## PRODUCTS

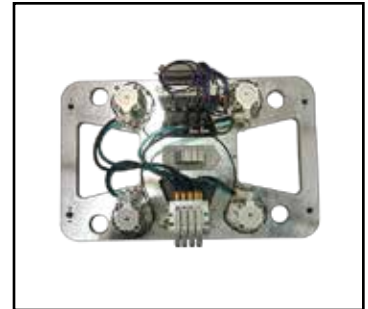

---

A family of catheter manufacturing equipment from R & D Engineering

# CATH-TECH™

Choose from a selection of products to support your equipment, tooling, custom automation, and machined component needs.

**CATH-TECH™** Reflow  
Cutters  
M Pullers  
Skivers  
Liner Stretchers  
Tippers  
Neckers  
Bonders & Fusers  
Assembly Fixtures

## Tooling

Extrusion Tools  
Assembly Automation

## Custom Automation

Framing/Guarding  
Assembly Automation  
Semi-Automated  
Test Equipment

## Machined Components

Quantity Range  
Precision Parts  
Prototyping/Pre-production
